PROFILE

I'm a Flutter Mobile Developer who builds production-ready mobile applications with a strong focus on user experience, state management, API integration, and real-time functionality such as maps, chat, and payments.

SKILLS

- Flutter mobile development Dart programming language Android app development Cross-platform application development UI/UX implementation in Flutter State management (GetX, Provider) RESTful API consumption JSON data handling Firebase Authentication Cloud Firestore Firebase Cloud Messaging (Push Notifications) Google Maps integration GPS & location tracking Real-time mobile applications In-app payment integration Mobile app performance optimization Version control (Git, GitHub)

PROFESSIONAL EXPERIENCE

Flutter Mobile Developer

2025 – 2026

Nugi Technologies

Develop and maintain Flutter mobile applications with a strong focus on clean UI, performance, and scalability.

Build responsive screens and reusable custom widgets from design specifications.

Integrate REST APIs for data fetching, updates, and real-time features.

Use GetX for state management to ensure smooth user interactions and predictable app behavior.

Collaborate with designers and product teams to deliver stable, user-friendly mobile features.

Debug and optimize existing Flutter codebases to improve performance and fix UI issues.

Flutter Mobile Developer

2023 – 2025

Bomach Groups

Built cross-platform Flutter mobile applications using Dart for Android devices.

Developed UI components, custom widgets, and responsive layouts in Flutter.

Consumed RESTful APIs and handled JSON data parsing and error states.

Implemented state management solutions using GetX and Provider.

Integrated Firebase Authentication, Cloud Firestore, and Push Notifications (FCM).

Implemented Google Maps integration, GPS services, and real-time location tracking.

Developed real-time mobile features including chat and live updates.

Optimized mobile application performance and improved user experience.

Used Git/GitHub for version control and collaborative development.

PROJECTS

E-commerce App

Enabled businesses to sell products efficiently online, leading to higher revenue and improved customer convenience.

Key Contributions:

- Designed an intuitive shopping interface for effortless product browsing and purchasing.
- Implemented secure payment systems to build user trust.
- Added real-time order tracking and push notifications to enhance customer experience.
- Optimized backend services to ensure fast and seamless app performance.

Chat Application

Created a secure and user-friendly messaging platform, facilitating real-time communication for individuals and businesses.

Key Contributions:

- Developed a real-time chat system using Firebase Firestore.
- Integrated push notifications to keep users updated instantly.
- Utilized WebSockets for smooth and efficient messaging.
- Implemented end-to-end encryption for privacy and data security.

Rider App

Improved urban mobility and ride coordination by offering real-time tracking and efficient ride-matching.

Key Contributions:

- Integrated Google Maps API for precise location tracking.
- Developed ride-matching algorithms to connect users with drivers quickly.
- Implemented fare estimation and seamless in-app payments.
- Designed an easy-to-use interface for smooth ride booking and navigation.

CERTIFICATES

- Flutter & Dart Certification –
Digital Dreams
